

TIS Photo Permission Guidelines

During the school year, there are occasions when TIS staff members may take photographs or film students participating in various school activities. These images provide a valuable record of life at TIS and help communicate the individual and team achievements at our school. TIS may use the images as part of our school displays and in printed publications, such as the Curriculum Guides, Insight Magazine, and Yearbook. They may also be used on our school website, school social networking services, and occasionally for marketing or promotional activities.

- Images will be carefully and sensitively chosen and will not be used out of context
- Images will become part of the school archive, providing a visual insight for future generations of TIS.
- Students will not be identified by full name in photographs without your or your child's permission, although we may wish to refer to them by first name only. Groups may be referred to collectively by grade or house or team.

Therefore, TIS seeks parental permission before photographing or making any recordings of your child. Parents can update their privacy choice by logging onto Gibbon. If you have no objections to your child's image being used and archived by the school, then there is no need to notify us. However, if you would prefer that your child is NOT photographed then we ask you to indicate your choice under the **Miscellaneous Section**, marked "**Privacy**", by ticking the boxes of either **Internal or External Communications**, or both, that you DO NOT wish your child's image to appear. The categories are explained below.
